

# Dermaphoria

Amnesiac Eric Norton wakes up in a police interrogation room burned from a meth lab explosion. As he tries to remember his past, his criminal employers and the police track his every move, both hoping to discover what Eric knows. However, Eric's confused memories are so entrenched in obscure drug-related street slang that even he can't make sense of them. After taking a mysterious new drug called "skin" - a drug that synthesizes the sensations of touch, Eric slowly begins to remember his life as a clandestine chemist and his relationship with an enigmatic woman named Desiree. But as Eric tries to piece together which memories are real and which are fabricated, he learns that finding your past can be just as painful as losing it.
