

Marxist Perspectives on South Korea in the Global Economy (Alternative Voices in Contemporary Economics)

This volume brings together work by international scholars to provide a unique analysis of the past, present and possible future trajectory of Korea's political economy from a distinctly Marxist perspective. The volume differentiates the Marxian approach to the political economy of Korean development from the Keynesian, social democratic approach that currently dominates the critical literature. In doing so the volume provides a unique view of the development of the South Korean Economy.

The Cultures of Globalization - Bryn Mawr College contribute to significantly different outcomes in global economic power.
