

# Realism to Calligraphic Cubism: The Legacy of Sadequain from Paris to Pakistan

This book is a celebration of the most intriguing and innovative artwork of a national icon, who crossed the traditional and predefined boundaries of artistic forms, norms, subjects, objects, shades, dimensions, and every other confinement that he deemed as an obstruction. He did not work under some preordained plan, but rather allowed his instincts guide him freely toward the peaks of perfection. Compliance was not in his genes. The book documents the period Sadequain lived in Paris during the 1960s and produced some of the most explosive pieces of work, which have never been cataloged in the past.
