

## Magic and Writing Workshop

This is a book about creative writing that relates literature with magic. The magical moments of the day, the energy of the Moon goddesses and the Sun gods, the eternal return, the magical dates, even atmospheric phenomena, are elements that you can use to write, to create stories or to make them stronger. This book will teach you how to do this and it is dedicated to lovers of culture and to those of you who like magic in life and literature. And at the end of each theme there are writing suggestions that you can put into practice what you have learnt.
